DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 8,9,10,11,12,14,15,and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Helle et al (US 4,412,188).

The reference by Helle et al discloses a temperature compensated piezo-electric oscillator(see figure 7), with piezo-element(1), an AT cut type(see background), as well as an amplifier(2) and variable capacitor(Cv, a varactor). A compensation voltage generating circuit including two separate ambient temperature control circuits with output terminals(7,8). These two circuits allow for complementary variable voltages to be developed dependent on the ambient temperature. Thermo-sensitive elements(RT3,RT4,thermistors) with a plurality of resistors are shown((R4,5; R14,15) in addition to others. The first and second voltage generating circuits includes the parallel circuit connected to respective terminals of the piezo oscillator and comprises a

first thermo sensitive element(RT1) and resistor (R4); the other parallel circuit(RT5,R15). Note second parallel circuits(RT2,R5) and (RT4,R14) connected in series to the first pair of parallel circuits.

Allowable Subject Matter

4. Claims 13,16-18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
